is the projectables Solar System night light?

Transform your ceiling into an astronomical wonder-space with the Projectables Solar System LED Plug-In Night Light. This unique night light provides a calming blue guide light while projecting a 3' space image onto the wall, ceiling or floor, creating a celestial wonder that unfolds gradually before your very eyes.

What is our Solar System night light?

Embark on a celestial journey with our Solar System Night Light. Glass sphere decorated inside with an intricate depiction of the planets in our solar system, identified by Nicolaus Copernicus (1473-1543), a Polish astronomer, mathematician and the first European scientist to propose that the Earth and other planets revolve around the sun.

What is an led Night Light?

The LED night light features a long-lasting LED light bulb that never needs replacing and a rotating globe that empowers easy image projection. The rotating imagery showcases vastness of the Milky Way galaxy, including the full solar system. Its light sensing technology automatically turns on at dusk and off at dawn.

How do solar lights work at night?

During the day, solar panels in solar lights create energy and charge batteries. At night, power switches to the batteries, keeping the lights running.

What is a projectables night light?

The Projectables solar system night light features cool-touch housing for safe use in all spaces; it's covered under a 90-day warranty for added convenience. The night light functions as a soothing guide light for a dim room or hallway, providing enough illumination to move about safely without disrupting sleep.

What is a projection night light?

The LED Projection Night Light is a small round globe that projects a solar system image on the wall or ceiling. The light enables you to see in the dark while enjoying a projected image of planets and stars. A bright blue glow illuminates the globe, perfect for guiding you through the night. The Projection Night Light is great for a child's room.
