Note: Make sure you have a grown up with you to help with scissors and small pieces Move the sticks from side-to-side, Bingo and Floppy can now float! Take Bingo and Floppy on an adventure through space! .

This Space box includes 3 big activities - Make your own beautiful Solar System Mobile. Learn about the constellations by projector. Learn how a rocket works by doing a simple science experiment. BUILD THE WHOLE SOLAR SYSTEM: Assemble a set of space-themed models to build a miniature solar system.

There are eight known planets orbiting our sun, including Earth. Making a model is a fun introduction to this solar system, and a good art project for primary school science classes. This detailed example can take a few hours to make, but most of that involves waiting for paint or clay to dry.

Making shoebox dioramas is one of the more fun things to do as an elementary and middle school student. Although shoebox solar system models cannot generally be made to scale, they are a fun and effective way to learn the position of planets and the proportional size difference between planets, and.

Creating a solar system working model using a cardboard box is a fantastic project that allows you to visually display the solar system while incorporating LED lights for added effect. The box can serve as a display case or an interactive element where the planets are suspended or mounted inside.

Learn about the planets in our amazing solar system with this hands-on solar system project. Find out how to make a solar system model for a school project or for home. All you need are a few simple supplies to create your own solar system diorama, and our printable solar system template below.
