

Solar system project shoe box

Overview

Can a shoebox Solar System be made to scale?

Although shoebox solar system models cannot generally be made to scale, they are a fun and effective way to learn the position of planets and the proportional size difference between planets, and especially between the planets and the sun. Paint the whole inside of the shoebox black.

How do you put planets in a shoe box?

Tape each planet, in order from the sun, to the top of the shoe box so they hang down in place. Cut out and add the planet names on each string. Our solar system is an amazing and vast place in space that consists of our sun, eight planets, and various other celestial objects.

How do you make a free Solar System project?

Make sure to grab the printable solar system templates and project guide! Get your free printable solar system project! STEP 1: Print out the planet order coloring sheet and draw with markers. Then, cut out with scissors. STEP 2: Color the sun template and cut out. STEP 3: Paint the inside of a shoe box with black acrylic paint and let dry.

How do you make a model Sun in a shoebox?

Cut a Styrofoam ball in half. The largest ball should be used, because this ball is going to represent the sun. Paint the sun yellow. Only the curved part of the ball needs to be painted. Glue the flat side of the model sun onto one of the sides of the shoebox. This will give the effect of the sun protruding out from space.

How do you make a solar system model?

To make a solar system model, start by finding a large cardboard box and painting it black to represent space. Next, gather 5 polystyrene balls in various sizes to represent gas giants like the sun, Jupiter, and Neptune. Paint

the largest ball yellow, then paint the remaining planets.

What is the 3rd grade model of the Solar System project?
