

Solar water still for sale

Overview

What is a solar still?

With its ability to provide a dependable source of safe water in areas lacking access to traditional purification systems, the Solar Still represents a significant step toward promoting global health, sustainability, and resilience in the face of water-related challenges. Contaminated water is placed in the evaporation basin.

Where can solar stills be used?

Solar stills can be used in poverty-stricken areas, in deserts, at sea and to help reduce energy costs and pollution as stills are environmentally friendly. In this article, we'll cover: The Aquamate inflatable solar still utilizes the sun to turn contaminated water into freshwater. Ideal for ocean trips. Full review at end of article.

How much does the AquaMate solar still weigh?

The Aquamate Solar Still is packable, weighing only 38 oz., and is contained in a resilient bright neon green tear-out package. You can take this life saving water purification device anywhere! Remember, normal water filters and water purification tablets cannot make sea water safe to drink, and sea water must be distilled.

What is AquaMate solar still?

The Aquamate Solar Still is a very cost effective solution to purify water whenever you need to. The perfect addition to prepare for emergencies and disasters! Tear open pack for emergencies. Easily inflated by mouth. Lanyard for fixing to vessel or other object. Pure water stored in separate pouch. Proven reliability. RE-USEABLE!.

Which solar still is best for water purification?

This inflatable Aquamate solar still is a great choice for emergency water

purification. It provides an inexpensive way to extract pure water from seawater and contaminated water, including urine.

Can a solar still purify sea water?

Remember, normal water filters and water purification tablets cannot make sea water safe to drink, and sea water must be distilled. Reverse osmosis filters can cost thousands of dollars and need careful maintenance. The Aquamate Solar Still is a very cost effective solution to purify water whenever you need to.
