Solar water heaters—sometimes called solar domestic hot water systems—can be a cost-effective way to generate hot water for your home. They can be used in any climate, and the fuel they use—sunshine—is free. Solar water heating systems include storage tanks and solar collectors. There are two types.

Rheem offers a variety of solar water heaters to provide hot water for your home with great efficiency and low energy costs. Choose from a variety of options to store your hot water and provide backup capabilities if necessary. Find local rebates for your new Rheem water heater. Find what you need.

Lower water bills, clean energy and heating water by the power of the sun are a few great reasons why more people are warming up to solar water heaters. In fact, the Solar Energy Industries Association (SEIA), a national solar trade association, predicts the use of solar energy will increase by 42%.

Unlike solar panels, there are quite a few different solar water heaters, and that can make it a bit confusing to find the type that will work best for your home. So, before you just pick the first one you see advertised, let me give you an easy-to-understand overview of what these systems are all.

A. O. Smith's residential solar water heaters reduce utility costs while maintaining a steady supply of hot water to your home with a supplementary electric heating element when solar energy is not available. A residential solar system can reduce utility costs for water heating by up to 70%. Both.

The Sunbank 40 gallon solar water heater is a complete passive solar water heating system that is easy to install, efficient, and affordable. It has many applications, from residential both on and off-grid, to any commercial application that requires hot water. It includes the tank, evacuated tube.
