

# Star sun solar reviews

## Overview

---

Is Sun solar electric a good company?

Sun Solar Electric was highly knowledgeable on both products, including future outfitting of car charging as well as sizing the system to accommodate future expansion of a rental cottage on the property and other future electrical upgrades. The entire staff at Sun Solar Electric were great to work with.

What's a good experience with Sun solar?

A wonderful experience from soup to nuts. The sales rep, Niles, was pleasant, knowledgeable, and transparent. My positive experience with him was in sharp contrast to reps from other companies. The installers were equally professional, timely, and very communicative. Sun Solar took care of permits and inspections.

Did Sun solar install my Home Solar System?

Sun Solar did the installation of our home solar system. They were professional, on time, and their budget came in far less than other solar providers. The entire process was smooth from start to finish and they worked very well with the roofer we identified to do repairs prior to the installation.

What's it like working with Sun solar?

Sun Solar took care of permits and inspections. The entire experience was excellent. The icing on the cake is that it was also the lowest of three bids I received, and by a significant margin. I very much appreciated working with this company.
