Tuhorse THS series submersible solar powered water pumps eliminate the need to be on a power grid at very competitive prices. In a typical live stock farm, a one time affordable investment on a Tuhorse green energy water system can immediately save you money, and save more in the years to come. What is a solar powered water pump?

The Solatec Solar Powered Water Pump is an excellent choice for those customers who are looking for a floatable model that would be easy to install and easy to clean as well. The product features a polycrystalline silicon solar panel that converts sunlight into electricity to power a brushless motor that keeps an internal submersible pump working.

What is a submersible solar water pump?

A submersible solar water pump is a type of solar pump that is used to transfer water from an underground source to the surface. Submersible 1HP solar water pump is used where the depth of water is more than 20 meters. This type of solar water pump is used for various applications such as irrigation or supplying water for communities.

Are Tuhorse THS submersible solar powered water pumps a good investment?

Tuhorse THS series submersible solar powered water pumps eliminate the need to be on a power grid at very competitive prices. In a typical live stock farm, a one time affordable investment on a Tuhorse green energy water system can immediately save you money, and save more in the years to come.

How high can a solar powered submersible water pump be?

Furthermore, the height that can be achieved by the solar powered submersible water pump can be up to 30-60 cm depending on the availability of sunlight on the surface of the solar panel. The submersible pump runs automatically with the output of the solar cell, with no battery backup.

Do I need a solar inverter for a submersible water pump?

Solar inverter is not required in this type of solar pump. 6200 – 38400 liters per day. 5 years warranty for complete solar system and 25 years for solar panel. A 1 HP AC submersible water pump needs AC power/electricity to function. We can't connect it with the solar panels directly as DC electricity cannot be used to power these water pumps.

Do solar water pumps cost a lot?

And like all solar-powered devices, solar water pumps don't have any ongoing operational costs. This means that once the initial investment is made, the cost of pumping water becomes negligible. Solar water pumps also have a long lifespan, with many models lasting up to 15 to 20 years or more.
