

Sunpower solar panels for boats

Overview

What types of solar panels are available for boats & vans?

We provide all sizes of premium, marine grade flexible (bimini mounted), walkable (deck mounted), rail mounted carbon fiber, and rigid (arch/davit/deck) marine solar panels for boats and vans. We use the highest efficiency solar cells available to maximize power output per square foot.

What are the best marine solar panels?

The best marine solar panels have five essential components: 1. Sunpower cells - even if a cell is partially shaded they still produce power. Sunpower's A+ grade cells (Maxeon) are among the best available putting out up to 25.4% efficiency. 2. Potted (silicone filled) junction boxes - so saltwater cannot corrode the electronics. 3.

Are solar panels suitable for marine use?

Solar panels can be a great option for marine use, but not all panels and solar kits are suitable for use around water. Additionally, the panel you choose needs to be selected based on how you want to use your solar power system.

What types of boats can you outfit with solar panels?

We outfit sailboats, power boats, yachts, houseboats, trawlers, tugboats, pleasure boats, commercial fishing and ferry boats, navigation buoys, vans and RVs. Our solar panels are designed in the USA and built to our specifications especially for marine environments by highly acclaimed manufacturers.

Where can I find a SunPower solar panel?

Look for the SunPower logo. Sun Powered Yachts is an authorized dealer of SunPower flexible solar panels 50W, 110W & 170W. High efficiency, marine flexible solar panels for your boat or yacht. Best warranty, highest rated & most durable. Disconnect from the dock and start sailing with the sun.

Do boats need solar panels?

For certain types of boats — like small fishing boats and sailboats — solar panels will be the only source of electricity. Other boat owners feel comfortable relying on generators if they have them, and some use their boats only for short durations, which makes having an on-board solar array less valuable.
