

Sunpower solar panels uk

Overview

Who is SunPower?

SunPower is a solar panel manufacturing company that has been in operation for 35 years in the US.

What makes SunPower so special?

Founded in Silicon Valley, SunPower came to dominate the residential solar industry with its premium high efficiency panel offering. In 2020, Maxeon Solar Technologies was spun off from US-based SunPower Corporation as an independent company that sells SunPower panels internationally. But what makes the SunPower brand so special, if indeed it is?

.

What makes SunPower solar panels so special?

The underlying technology that gives rise to SunPower's superior panel performance is its patented Maxeon solar cell. These solar cells differ from conventional cells in that they utilise back-contact technology, which means no current collecting wires ('fingers' and 'busbars') on the top surface of the cells.

Is SunPower still selling solar panels?

SunPower continues to sell solar panels through Maxeon Solar Technologies, an independent entity formed from SunPower in 2020.

How much does a SunPower panel cost?

SunPower panels really do represent the best quality technology on the market, but unsurprisingly this comes at a price: around £480 per kWp (so just under £2000 for a 4kWp system). That's about a 25% uplift, depending on the overall project complexity. For this to be justified, you would want to see a 25% uplift in output.

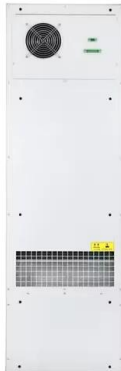

Does SunPower offer a 40-year warranty?

SunPower offers a 40-year warranty for its flagship SunPower Maxeon solar panels. This warranty covers both the product and its power output. SunPower's 40-year warranty is one of the most generous available to homeowners of any solar panel warranty.
