

Thunderbolt 100 watt solar charge regulator

Overview

What is a thunderbolt solar charge regulator?

The Thunderbolt Solar Charge Regulator isn't just another addition to the solar energy market—it's revolutionizing how we capture, convert, and utilize the sun's abundant power. As someone.

How does a solar charge regulator work?

This solar charge regulator protects and regulates the charge of a 12 volt storage battery using solar panels. The solar charge regulator features three LED indicators (high voltage, low voltage, charging) and three connections for the solar panel (keyed two-pin connector), battery (keyed two-pin connector) and 12v output (3 in. pigtail).

What is a thunderbolt® solar panel?

Through his vision and engineering expertise, the very first Thunderbolt® panel was born. This versatile, durable panel made solar energy achievable for the mainstream consumer. Since then, we've grown into one of America's most recognized and trusted solar brands.

How much does a solar charge regulator cost?

The regulator provides overcharge protection at 14 volts and discharge protection at 10.5 volts. Compare our price of \$14.99 to SCHUMACHER ELECTRIC at \$27.86 (model number: SPC7A). Save 39% by shopping at Harbor Freight. This solar charge regulator protects and regulates the charge of a 12 volt storage battery using solar panels.

Who is Thunderbolt solar?

At Thunderbolt, we are passionate about making renewable solar energy accessible and affordable for everyone. For over 40 years, we have been pioneering innovative solar products that deliver reliable, independent power for homes, businesses, and off-grid activities.

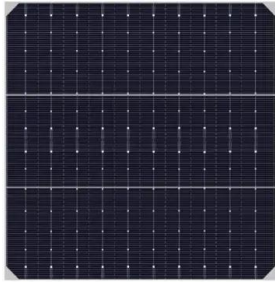

Is Thunderbolt a good solar system for a garage roof?

Thunderbolt's 400 watt solar panel kit was super easy to install on my garage roof, even as a total solar newbie. Their included battery banks provide plenty of stored power to keep my essentials running if (let's be honest - when) the power goes down.
