

Thunderbolt solar charge regulator

Overview

The Thunderbolt Solar Charge Regulator is more than a simple voltage controller—it's a comprehensive energy management system designed to maximize efficiency while extending the lifespan of your entire solar setup.

The Thunderbolt Solar Charge Regulator is more than a simple voltage controller—it's a comprehensive energy management system designed to maximize efficiency while extending the lifespan of your entire solar setup.

This solar charge regulator protects and regulates the charge of a 12 volt storage battery using solar panels. The solar charge regulator features three LED indicators (high voltage, low voltage, charging) and three connections for the solar panel (keyed two-pin connector), battery (keyed two-pin.

Harbor Freight buys their top quality tools from the same factories that supply our competitors. We cut out the middleman and pass the savings to you! .

At its core, a solar charge regulator serves as the brain of your solar power system. The Thunderbolt, however, takes this concept several steps further. This sophisticated device sits between your solar panels and batteries, intelligently managing the flow of electricity to ensure optimal charging.

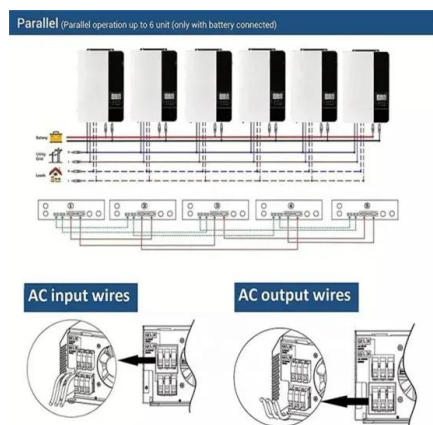

Our all-in-one DIY solar kits include panels, mounts, charge controllers and accessories for hassle-free installation. We offer tools, detailed manuals and videos to guide you through each step. Complex jobs can be handled by our nationwide network of solar pros. Even after purchase, you'll have.
