

Trailer tracking solar powered

Overview

What is a solar-powered GPS tracker?

Solar-powered GPS trackers are ideal for industries needing real-time tracking without worrying about power supplies or maintenance. These devices are designed to harness solar energy and ensure continuous tracking, making them perfect for monitoring equipment, vehicles, or containers in remote or off-grid locations.

Are solar powered GPS trackers a good option?

Solar powered GPS tracking is becoming a more attractive option every day. Battery technology and photovoltaic technology has allows the tracker to become smaller in size and easier to hide.

What is a solar powered asset tracking device?

From agriculture to construction and logistics, a solar powered asset tracking device is ideal for managing assets in remote or hard-to-reach locations. Track trailers, containers, heavy equipment, or any mobile assets confidently. A solar GPS tracking device keeps you informed about your assets' precise location, usage, and condition.

What is a solar power tracking system?

A solar power tracking system offers peace of mind, ensuring your assets are always monitored without draining resources. Built for durability, these devices are weather-resistant and function in the most challenging environments.

Can I use solar power on a trailer/container?

Yes, our solar-powered GPS tracker can be used on any trailer/container. It has a proven solar-powered design with no maintenance for up to 10 years.

Why should you use a solar tracker?

With built-in solar panels, these devices charge their batteries, so you won't need to worry about downtime or frequent battery changes. Whether your assets are stationary or on the move, a solar tracker device guarantees constant oversight with minimal intervention.
