

# **Turnkey solar container shipping and installation cost in Philippines**

## Overview

---

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and demand. The 40-foot container, which is the one used for larger installations, ranges from \$4,500 to \$8,000.

Short version: From 2024, it costs between \$2,800 and \$5,500 to ship a 20-foot container of solar panels around the world, depending on origin, destination, fuel prices, and demand. The 40-foot container, which is the one used for larger installations, ranges from \$4,500 to \$8,000.

Thinking of going solar and want to know how much it will cost to ship those panels in a shipping container?

You're not alone. With renewable energy on the rise, particularly among off-gridders, businesses, and environmentally minded homeowners, solar panel shipping logistics are growing more.

The cost of a solar system really depends on how much electricity your home or business uses each month. If your electricity bill is around ₱5,000 or less, a small solar setup might be just right for you. This usually means about six solar panels, and you'll need around 20 square meters of roof.

The information provided in this article about solar installation costs in the Philippines is based on general estimates and trends as of February 23, 2025. Prices can vary depending on location, specific solar installers, equipment brands, government incentives, and individual project.

Metro Manila, Philippines - The solar installation price in the Philippines has come down significantly in recent years, making it more affordable for many people. However, the upfront cost of installing a solar energy system can still set you back significantly, but it is also important to.

Solar panel installation cost in the Philippines are influenced by various factors, such as the market situation, supply chain, manufacturer, and type of solar panel, they may be outdated and do not consider effects such as retail

chain crises or inflation. Accordingly, the current provider prices.

**Small Houses (₱400,000 and below):** A typical setup includes a 2kWp system with 5 solar panels, covering approximately 12m<sup>2</sup>. This system suits homes consuming around 224kWh monthly, with costs ranging from ₱150,000 to ₱210,000. **Medium-Cost Houses:** Usually equipped with a 4kWp system comprising 10.
