

What do solar panels cost

Overview

The average cost of solar panels ranges from \$17,350–\$38,000. This price range includes hardware, installation, and soft costs, but it does not account for additional components like solar batteries. Tax credits, rebates, and incentives can offset or lower the total cost of solar.

The average cost of solar panels ranges from \$17,350–\$38,000. This price range includes hardware, installation, and soft costs, but it does not account for additional components like solar batteries. Tax credits, rebates, and incentives can offset or lower the total cost of solar.

Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

The average cost of installing an average-size home solar system in 2025 is \$29,360 before federal tax credits and incentives. The federal solar tax credit may reduce the net cost to \$20,552, and local incentives can further lower the cost. You can determine whether solar panels are worth it for.

To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of Energy and prices from 54 retailers and manufacturers for popular solar panel brands. This chart refers to the average cost range across all common solar system sizes. Cost will vary depending on.

Today’s premium monocrystalline solar panels typically cost between 30 and 50 cents per Watt, putting the price of a single 400-watt solar panel between \$120 to \$200, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.25 per Watt. The cost of a solar.

Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7.2 kW system. While that price tag seems steep, the electricity bill savings you get from solar panels make them a worthwhile investment for most Americans. Our team of solar experts.

While the basic components of any rooftop solar system -- panels, inverters and optional batteries -- stay the same, the overall cost of solar panels can be different for each home. When calculating the overall cost, you need to take a look at the size of the system, the cost of labor and. How much do solar panels typically cost to install in a home?

The average cost to install solar panels is from \$10,626 to \$26,460 (after tax credit) for a 6kW to 12kW system to power an entire house. The average solar panel payback period is 7 to 12 years, and solar energy saves \$600 to \$2,000 per year on electricity costs.

What is the average cost of solar panels in the United States?

The average cost to install solar panels in the United States is about \$12,000 after federal tax incentives. On the low end, you can install a smaller system for around \$5,000, while a high-priced Tier 1 solar panel system can cost \$40,000 or more. There are additional costs that go into an installation project beyond the price of panels.

How much does a 6 kW solar panel installation typically cost?

Solar panels cost \$1.77 to \$2.20 per watt and a 6 kW solar panel installation for the average home costs from \$10,626 to \$13,230 after the 30% federal solar tax credit. Solar energy costs \$0.08 to \$0.10 per kWh to produce on average, depending on your location.
