

# **What size are solar panels on roofs**

## Overview

---

How many solar panels will fit on your roof?

The average solar panel is 78.74 x 157.48 centimeters, which you can use to roughly calculate how many panels your roof will hold. In this case, each panel takes up roughly 1.239-1.44 square meters of space. For a 19.72 square meter roof, you could install a maximum of 12-15 solar panels.

What is the typical size of a solar panel?

The standard solar panel size, the 60-cell is structured as a 6x10 grid and measures 3.25 feet by 5.5 feet. The average 72-cell solar panel size measures 3.25 feet by 6.42 feet and is laid out as a 6 x 12 grid, making them almost a foot taller than the 60-cell standard size panels.

What size Solar System do you actually need?

What size solar PV system do you need?

The size and output of your solar array depends on the size of your home, and your annual electricity usage. The average three-bedroom house will use 2,900 kWh per year, meaning you'll need 10 panels that generate 350 kW each for a kWp of 3.5.
