If you're ready to go solar, knowing who installs solar panels is essential. The answer isn't too surprising: A solar panel installation contractor is the best pro

to get your solar system running. Hiring a qualified solar panel installation company can help you harness the power of the sun and save on utility bills.

How do I get a solar panel installation project started?

Get your solar panel installation project started by requesting a free in-home energy consultation using the form above. Our licensed, local professionals will review your solar energy needs, provide product recommendations, and review your pricing and financing options.

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof — in a region with long peak sunlight hours — with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.

Can a solar panel system be installed on a roof?

Installing a solar panel system on your roof is possible with the necessary skills and knowledge and if your home is suitable for solar energy. However, we recommend hiring a professional solar panel installation company for this job.

How does a solar panel installer install a battery?

Solar panel pros will also install a battery if it's part of the solar panel system. Finally, your solar panel installer will wire the system, connecting the inverter wires and routing them through a junction box and PV disconnect switch to your home's circuit breaker box.

Do you need an electrician to install solar panels?

In fact, some states require solar panel installers to be licensed electricians. They can install the wiring that connects the solar panels to the power system. You can also hire an electrician to perform a solar panel inspection on a new home if they're experienced and hold the NABCEP certification. How Do Solar Panel Pros Install Solar Systems?
