Who installs solar panels?

If you're ready to go solar, knowing who installs solar panels is essential. The answer isn't too surprising: A solar panel installation contractor is the best pro to get your solar system running. Hiring a qualified solar panel installation company can help you harness the power of the sun and save on utility bills.

Should you install solar panels yourself?

You can install solar panels yourself, but doing it alone involves risks—especially when working against a deadline. Incentives can drastically lower your overall cost, but solar is still a big investment. To save money, it's no surprise that many homeowners consider a DIY approach.

How much does it cost to install solar panels?

This article was updated using automation technology and thoroughly reviewed for accuracy by HomeAdvisor Editor Ryan Noonan. Installing solar panels costs an average of \$27,173, with most homeowners spending between \$18,356 and \$36,403 on average. You can pay as little as \$3,500 or as high as \$55,000, depending on your project scope.

Are solar panels a good investment?

Solar panel installation costs have dropped significantly in the past decade. Solar energy systems can make new homes cost more and increase a home's selling price. The expense of installing solar panels can show returns in 5-10 years with lower power bills, depending on the home's location and energy needs.

Is a DIY solar panel installation a good idea?

A DIY solar panel installation is not the best option if you still rely on utility energy, which most people do. Installing solar panels without the proper expertise can lead to major issues that may cost you more in the long run.

How much does a solar system cost?

If you just need a few panels for a small do-it-yourself solar project, expect to

pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). Note: The table below doesn't include the cost of a solar storage battery, which can add anywhere from \$7,000 to \$18,000 to your total solar system costs.
