The average cost to install solar panels is \$12,600 to \$37,800 for a 6 kW to 12 kW system, after subtracting the 30% federal tax credit. Residential solar panels cost \$3.00 to \$4.50 per watt, including installation. However, the cost of solar panels continues to decrease each year as solar energy.

With the help of a local, licensed and insured professional on Airtasker, you can get your solar panels perfectly positioned, carefully installed, and safely tested to capture the sun's power. If you're not sure about how much solar panel installation costs or where to find the skills you need.

The average cost to install solar panels is around \$26,600, and most homeowners pay between \$4,500 and \$53,000. Keep in mind that these prices don't consider the federal investment tax credit (ITC), which can effectively reduce those costs by up to 30%. The price you can expect to pay

for solar.

Find an Installer Near Me - Link with certified local solar installers to install or upgrade your home's solar energy system. Click for more information » How do I find the best solar installer near me?

Follow these tips to hire the best installer near you: Look for installers who are members of the Solar Energy Industries Association (SEIA) and certified by the North American Board of Certified Energy Practitioners (NABCEP). Read their reviews on HomeGuide and Google. Get at least three in-person estimates to compare.

How much do solar panels cost?

Residential solar panels cost \$3.00 to \$4.50 per watt, including installation. However, the cost of solar panels continues to decrease each year as solar energy becomes more popular. The cost to convert your house to solar power depends on the type of solar panels, inverter, and equipment, your location, your energy needs, and local labor rates.

Does Home Depot install solar?

During your free in-home consultation, The Home Depot's local solar power installer will clearly explain the installation process and how easy it is for you to go solar. By powering your home with clean, renewable solar energy, you're creating a healthier environment and conserving natural resources.

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof — in a region with long peak sunlight hours — with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.

How do I get a solar installation?

Fill out the online form, and a trusted independent installer will call you to schedule a consultation. The solar specialist will review suggestions for your home based on square footage, power needs and appliance wattage to ensure a whole-home solution.

How do I choose a solar company for my home?

When beginning your home solar project, you might start by searching “Solar Providers Near Me.” Then, you’ll be presented with dozens of different solar companies to choose from. All of these installers will vary in size, equipment offerings, and reputability, and it can take months to line up multiple quotes. But there’s a better way.
