# **Who manufactures sunpower solar panels**

## Overview

---

Where are SunPower solar panels made?

The company initially focused on developing photovoltaic (PV) materials and devices for space applications. Maxeon Solar Technologies manufactures SunPower's solar panels in a variety of locations around the world. It is headquartered in Singapore, with production facilities in Malaysia, Mexico, France, and the Philippines.

Who makes Solaria solar panels?

Solaria, a leader in shingled-module technology, used a network of residential installation partners in the United States to distribute its high-tech panels. Complete Solar eventually sold Solaria's intellectual property to Maxeon, the panel manufacturing spinout of SunPower, formerly the country's largest residential installation dealer.

Who is SunPower Corporation?

SunPower Corporation is an American provider of photovoltaic solar energy generation systems and battery energy storage products, primarily for residential customers. The company, headquartered in San Jose, California, was founded in 1985 by Richard Swanson, an electrical engineering professor from Stanford University.

Does SunPower still make solar panels?

Once the companies divide, SunPower will no longer manufacture solar panels. However, it will still continue to supply the same solar services to customers. Tom Werner will maintain his role as CEO at the company's corporate headquarters in Silicon Valley. SunPower Corporation has a network comprised of over 500 dealers that it works with.

Is SunPower a publicly traded company?

SunPower Corporation is a publicly traded company, meaning that its

ownership is organized by stocks, which are owned by investors. Current shareholders will receive a 71% stake in Maxeon Solar when the company becomes public. SunPower's stocks have fluctuated quite a bit in the past.

Where are TZS solar panels made?

TZS has been one of the leading suppliers to Sunpower for many years, and it is a worldwide leader in silicon wafers. SunPower planned to continue making P-Series modules at the Oregon manufacturing facility for the US market but ceased production at its Oregon plant five months later.
