Wholesale price of containerized microgrid in Canada

Overview

What is a microgrid & how does it work?

Microgrids provide resilience, sustainability, and efficient energy solutions by leveraging onsite renewable generation with smart grid resources for better connectivity, decarbonization, and access to energy. This community healthcare facility ensures 24/7 patient care with our microgrid solution.

How is a microgrid different from a smart grid?

Microgrids are different from smart grids. A microgrid is a self-sufficient and localized energy system serving a discrete geographic footprint, which may be a business center, hospital complex, etc. It includes distributed energy sources and multiple loads, which can be operated parallelly with the broader utility grid.

What is a microgreen containerized energy storage solution?

The core technology used in Microgreen containerized energy storage solutions are top quality Lithium Ferrous Phosphate (LFP) cells from CATL. CATL's 280Ah LiFePO4 (LFP) cell is the safest and most stable chemistry among all types of lithium ion batteries, while achieving 6,000 charging cycles or more. CATL serves global automotive OEMs.

What are the different types of microgrid solutions?

1. Microgrid solutions from Schneider Electric Schneider Electric offers efficient microgrid solutions based on a combination of Edge Control Systems, Connected Products, Applications, Analytics, and Services. Connected Products include Uninterruptible Power Supply (UPS), Grid-Tie String Inverters, and Hybrid Inverters.

Can a microgrid improve rural electrification?

Progress in regulations, financing and tech has facilitated rural electrification. Adding a microgrid to a solar energy system can ensure an even brighter

future. Go all-digital and all-electric for more sustainable, resilient, efficient, and people-centric buildings.

How can Schneider Electric Help you design a microgrid?

Schneider Electric offers a ready-to-use solution to help you design a microgrid, regardless of the application. Our pre-engineered microgrid control centers have all the components you need for power management, control, energy metering, and power monitoring.
