The diagram illustrates a system architecture with the following components and connections:

- PC (Top Left):** Includes a monitor, tower, keyboard, and mouse. It is connected to the Network Switch via a network cable.
- Network Switch (Top Center):** A central hub for network connectivity, featuring multiple ports and a power supply.
- Server Rack (Bottom Left):** A rack of servers with various ports and indicators. It is connected to the Network Switch and the DC Distribution Unit.
- DC Distribution Unit (Bottom Center):** A unit that distributes DC power to the servers. It is connected to the Network Switch and the Server Rack.
- Server Rack (Bottom Right):** Another rack of servers, similar to the one on the left, connected to the Network Switch and the DC Distribution Unit.
- Power Supply (Top Right):** A power source that provides AC power to the system. It is connected to the Network Switch and the DC Distribution Unit.
- Connections:**
 - The Network Switch is connected to the PC, the Server Rack (Bottom Left), the Server Rack (Bottom Right), and the DC Distribution Unit.
 - The DC Distribution Unit is connected to the Server Rack (Bottom Left) and the Server Rack (Bottom Right).
 - The Power Supply is connected to the Network Switch and the DC Distribution Unit.

Three vertical battery units are shown, labeled 16kWh, 20kWh, and 24kWh. Each unit is white with a black top section and a blue vertical stripe. They are connected to a power source via black cables. The units are arranged in a row, showing increasing capacity and size from left to right.
